OF LISBON

A Cross-Layer SDN Orchestration Architecture for Stateful Edge Services: Design and Experimental Characterization

Pedro Ojo Oriakhi

Master's in Telecommunications and Computer Engineering

Supervisors:

Ph.D. Professor José Moura, Assistant Professor,
Iscte - Instituto Universitário de Lisboa

Ph.D. Professor Pedro Ramos, Assistant Professor,
Iscte - Instituto Universitário de Lisboa

Contents

Acknowledgments	iii
Resumo	v
Abstract	vii
List of Figures	xi
List of Tables	xiii
List of Acronyms	xv
Chapter 1. Introduction	1
1.1. Context, Motivation, and Problem Statement	1
1.2. Objectives	1
1.3. Research Questions	1
1.4. Research Methodology	1
1.5. Main Contributions of this Dissertation	1
1.6. Dissertation Structure	1
Chapter 2. Background and Related Work	3
2.1. Review Methodology	3
2.2. Edge Computing Architectures	3
2.3. Resource Allocation in Edge Computing	3
2.4. Elasticity and Auto-Scaling Mechanisms	3
2.5. Service Placement and Orchestration	3
2.6. Software-Defined Networking for Edge Systems	3
2.7. Summary and Research Gaps	3
Chapter 3. Architecture and Design of Proposed Solution for Edge Services	5
3.1. Design Requirements	5
3.2. Architecture	5
3.3. Distributed Elastic Allocation of Resources	5
3.3.1. Services	5
3.3.2. Data	5
3.4. Monitoring and Decision Engine	5
3.5. Control Workflow	5
Chapter 4. Implementation of Proposed Solution	7

4.1. Experimental Infrastructure	7
4.2. Distributed Elastic Allocation of Resources	7
4.2.1. Services	7
4.2.2. Data	7
4.3. Monitoring and Decision Engine	7
4.4. Control Workflow	7
4.5. Implementation Validation	7
Chapter 5. Evaluation Methodology	9
5.1. Experimental Objectives	9
5.2. Evaluation Scenarios	9
5.3. Performance Metrics	9
5.4. Experimental Procedure with Results Statistical Analysis	9
Chapter 6. Experimental Results	11
6.1. Resource Allocation Efficiency	11
6.2. Elastic Scaling Performance	11
6.3. Service Placement Effectiveness	11
6.4. Network Performance	11
6.5. Scalability Analysis	11
6.6. Discussion	11
Chapter 7. Conclusions and Future Work	13
7.1. Conclusions	13
7.2. Research Contributions	13
7.3. Limitations	13
7.4. Future Research Directions	13

List of Figures

List of Tables

[This page is intentionally left blank.]

List of Acronyms

:

[This page is intentionally left blank.]

CHAPTER 1

Introduction

1.1. Context, Motivation, and Problem Statement

1.2. Objectives

1.3. Research Questions

1.4. Research Methodology

1.5. Main Contributions of this Dissertation

1.6. Dissertation Structure

[This page is intentionally left blank.]

CHAPTER 2

Background and Related Work

- 2.1. Review Methodology
- 2.2. Edge Computing Architectures
- 2.3. Resource Allocation in Edge Computing
- 2.4. Elasticity and Auto-Scaling Mechanisms
- 2.5. Service Placement and Orchestration
- 2.6. Software-Defined Networking for Edge Systems
- 2.7. Summary and Research Gaps

[This page is intentionally left blank.]

CHAPTER 3

Architecture and Design of Proposed Solution for Edge Services

3.1. Design Requirements

3.2. Architecture

3.3. Distributed Elastic Allocation of Resources

3.3.1. Services

3.3.2. Data

3.4. Monitoring and Decision Engine

3.5. Control Workflow

[This page is intentionally left blank.]

CHAPTER 4

Implementation of Proposed Solution

4.1. Experimental Infrastructure

4.2. Distributed Elastic Allocation of Resources

4.2.1. Services

4.2.2. Data

4.3. Monitoring and Decision Engine

4.4. Control Workflow

4.5. Implementation Validation

[This page is intentionally left blank.]

CHAPTER 5

Evaluation Methodology

5.1. Experimental Objectives

5.2. Evaluation Scenarios

5.3. Performance Metrics

5.4. Experimental Procedure with Results Statistical Analysis

[This page is intentionally left blank.]

CHAPTER 6

Experimental Results

- 6.1. Resource Allocation Efficiency
- 6.2. Elastic Scaling Performance
- 6.3. Service Placement Effectiveness
- 6.4. Network Performance
- 6.5. Scalability Analysis
- 6.6. Discussion

[This page is intentionally left blank.]

CHAPTER 7

Conclusions and Future Work

7.1. Conclusions

7.2. Research Contributions

7.3. Limitations

7.4. Future Research Directions
